

# Product data sheet Industrial basket 58 litre.

Product(description)	Product code	Material
Industrial basket 58 ltr. orange	0700058	LLDPE

Capacity	Litres	Gallons
Industrial basket 58 ltr. orange	58	15,3

Weight	Grams	Ounces
Industrial basket 58 ltr. orange	2000	70,55

Product identification	
Manufacturer ID	: bottom basket
Date Clock	: bottom basket
Country of origin	: The Netherlands

Temperature
Recommended temperature for normal use is a maximum of 70°C/158°F
The peak melting temperature is 123°C/253°F (the point where the material melts)
The vicat softening temperature is 96°C/205°F (the point where the material is at a temperature that there is a pin to pass through with minimal pressure)
With this information we would not recommend to use the industrial baskets under conditions of 80/90°C - 176/194°F or higher, since the life span of the basket is then minimal
Use under conditions with temperatures around 50/60°C- 122/140°F are no problem
